OBJECTIVE

Fullstack Developer with 3 years of experience, specializing in front-end development using React, Next.js, and Vue.js. Skilled in building responsive, high-performance web applications with a focus on clean UI and great user experience. Familiar with backend development and passionate about delivering scalable, maintainable solutions.

SKILLS

Technical Skills	Javascript, Typescript, ReactJS, NextJS, NuxtJS, VueJS, Prompt Engineering,
Version Control	Git, Bitbucket

EXPERIENCE

Fullstack Developer, Edvoy Technologies

2022 – Present

Edvoy Pay

A scalable in-house payment platform for processing application and deposit fees through the Edvoy ecosystem.

- Led the complete front-end development using Vue 3 with Composition API, ensuring a smooth and secure user experience.
- Implemented Stripe and Flywire integrations on the UI side with real-time status updates and error handling.
- Developed responsive, mobile-friendly views and implemented dynamic fee calculators with clear visual feedback.

Tech Stack: Vue 3, Composition API, Tailwind CSS, Stripe.js, Flywire SDK

Edvoy Stays

A student accommodation platform integrated with third-party property providers.

- Built the entire front-end from scratch using Vue 3, creating dynamic listing pages, filters, property detail views, and calendar integration.
- Developed a clean, scalable UI with reusable components and modular architecture.

Tech Stack: Vue 3, Composition API, Vue Router, Tailwind CSS

Edvoy Funds

An education loan application platform integrated with multiple finance partners.

- Designed and developed all front-end interfaces using Vue 3, including student loan applications, status tracking, and a vendor portal UI.
- Created dashboards and lead management UIs for internal and vendor users with condition-based rendering and filters.

Tech Stack: Vue 3, Tailwind CSS

edvoy.com

The company's main website providing study abroad services and resources.

- Contributed to the migration from Nuxt.js to Next.js, building scalable, SEO-optimized pages and components.
- Worked with marketing and SEO teams to implement technical SEO improvements (structured data, canonical tags).
- Delivered performance-optimized pages using lazy loading, code splitting, and optimized images.

Tech Stack: Next.js, React.js, Redux, Strapi, GraphQL, Tailwind CSS

PROJECTS

Miro Clone – Collaborative Whiteboard App

Built a real-time collaborative whiteboard application inspired by Miro, featuring drawing tools and multi-user interaction.

- Developed a custom whiteboard experience using the native Canvas API, enabling freehand drawing, shapes, and basic editing tools.
- Implemented real-time collaboration with Socket.IO, allowing multiple users to interact simultaneously on the same board.
- Used Zustand for local state management, supporting drawing modes, tool selection, and session data.

EDUCATION

Master of Science (Computer Science)

Expected 2026

Anna University Centre for Distance Education - Chennai

B.Sc Chemistry

2018 - 2021

The American College - Madurai
